INVESTOR NEWSLEETEE Volume 15, July 2024

PT. Triputra Agro Persada Tbk (TAPG) is an oil palm, rubber, and processing industries company, with 23 oil palm plantation estates, 1 rubber plantation, 18 palm oil mills, 1 palm kernel crushing plant and 1 RSS factory located in Jambi, Central Kalimantan and East Kalimantan (including the presence of associate company). In developing its business, TAPG upholds its sustainability commitment by adopting the global recognized standards and deployment of state-of-the-art technology in all of its operational activities.

Executive Summary

TAPG production for FFB and CPO increase by $\blacktriangle 4\% \&$ $\backsim 3\% QoQ$, and the trend will continue. There will a shift in the production pattern compared to 2023, peak level of production starting from Q3 2024.

TAPG in 2024 focus on productivity, good agronomy practice and infrastructure in order to achieve optimum output during the prime age and to maintain delivery levels under all conditions.

In Q2 2024 revenue increased primarily driven by higher selling price $\blacktriangle 16\%$ YoY and $\blacktriangle 6\%$ QoQ with higher delivery in Q2 2024 QoQ.

Lower COGS (mainly in fertilizer costs) and higher selling prices led to boost in EBITDA and net profit in Q2 2024 ▲ 146% and ▲ 247% YoY. Financial performance at the end of 2024 is expected better than 2023.

Business Highlight

- In Q2 2024, FFB Production increased by ▲4% QoQ, and the trend will continue.
- In 2024, there will a shift in the production pattern compared to 2023, peak level of production starting from Q3 2024.
- There is a potential for the La Nina phenomenon in second half of 2024, which could be affect production as it enters the peak harvest season.

INVESTOR **NEWSLETTER** TAPG

Financial Highlight

In Q2 2024, FFB Production increased by $\blacktriangle 4\%$ QoQ, and the trend will continue. The peak harvest forecast starting in Q3 2024 and higher production for 2024 compared to last year. CPO and Palm Kernel (PK), growth by a $\blacktriangle 3\%$ QoQ. Similar to FFB, CPO and PK forecast continue growth H2 2024.

COGS decreased in Q2 2024 by ▼5% YoY, primarily driven by lower in fertilizer cost which saw a ▼43% YoY. FFB purchased remains flat in Q2 2024 due to lower volume but higher price purchased. TAPG focus on good agricultural practice and infrastructure to maintain delivery levels under all conditions.

CPO prices still in the high level in line with tight global vegetable oil supply as La Niña threatens supplies of the world vegetable oil.

TRIPUTRA AGRO PERSADA

Q2 2024 revenue increased $\blacktriangle 17\%$ YoY and $\blacktriangle 13\%$ QoQ primarily driven by higher selling price $\blacktriangle 16\%$ YoY and $\blacktriangle 6\%$ QoQ with higher delivery in Q2 2024 QoQ.

Lower COGS (mainly in fertilizer costs) and higher selling prices led to boost in EBITDA and net profit in Q2 2024 \blacktriangle 146% and \blacktriangle 247% YoY. Financial performance at the end of 2024 is expected better than 2023.

Financial Performance

Descriptions	Q2 2024	Q2 2023	Growth (%)	H1 2024	H1 2023	Growth (%)

Prospects

There is a potential for the La Nina phenomenon in second half of 2024, which could be affect production as it enters the peak harvest season. Due to La Nina the climate in H2 2024 predicted to be wetter, and will affect to the pollination.

Strengthen critical infrastructure (including roads, bridges, and storage facilities) to withstand wetter climate in order to ensure operation and delivery.

Peak harvest forecast starting in Q3 2024 and with competitive cost will boost performance in 2024 compared to last year.

Age Profile As of June 2024 Total : 160.785 Ha (Palm Oil)

INVESTOR **NEWSLETTER**

Operational Highight

In 2024, there will a shift in the production pattern compared to 2023, peak level of production starting from Q3 2024. La Niña typically brings higher rainfall to certain regions, which can enhance water availability. This can lead to increased production yields over the next 1-2 years.

TAPG business strategies in 2024 is to optimize prime aged profile focused on productivity through good agricultural practices and in infrastructure to maintain delivery levels under all conditions and. Pollination has been good since starting of the year, thus OER stay high in Q2 2024.
